

Mt. Angel Fire District Key Safe Permit

Any occupancy wishing to provide the Mt. Angel Fire District with an access key must acquire a Supra Brand Key Safe, fitted with a tile-type lock. The expense of the key safe, mounting the key safe and all keys is the responsibility of the occupant listed below. All keys fitting the safe will be retained by the Mt. Angel Fire District.

I/we the undersigned agree to follow the guides as required by the Mt. Angel Fire District, on securing and locating a key safe for use by the Mt. Angel Fire District in case of an emergency after normal working hours. The intent of the key safe and key is to provide both security and emergency access for the Mt. Angel Fire District.

It is our recommendation that you locate the key safe on the front of the structure near the left side of the main entrance to the building at a height above grade level of 10 feet.

Occupant/Business Name: _____

Occupant/Business Address: _____

Mailing Address: _____

Emergency Contact Name & Phone Number(s): _____

Location of the key safe: _____

Location code: _____

Signature of authorized official: _____ **Date:** _____
